ASSIGNMENT – 01

Vehicle Service Request Form Basic Fields Use Case

NAME: S VISHAL
ROLL NO: 240701600

240701600

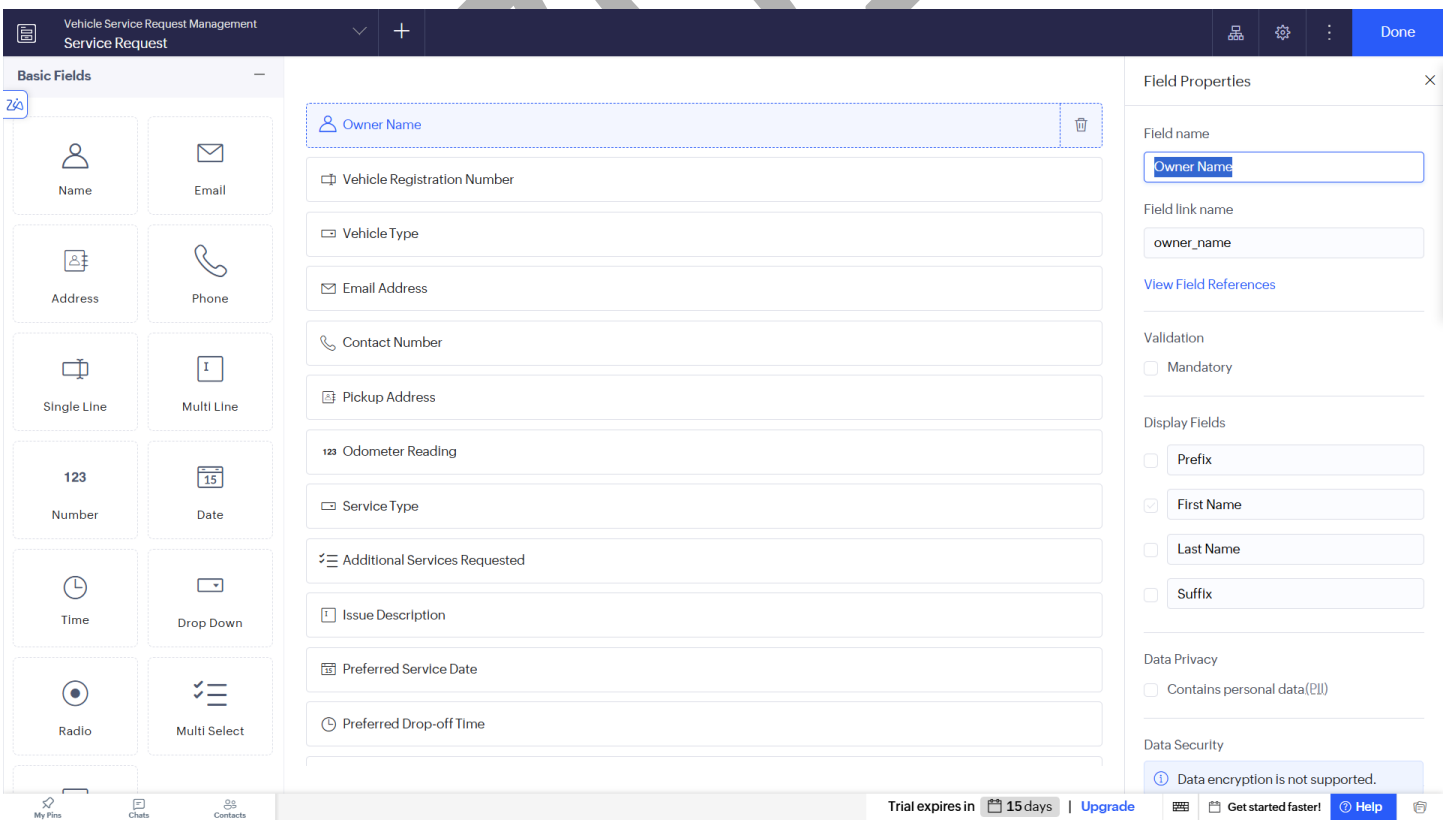

Objective:

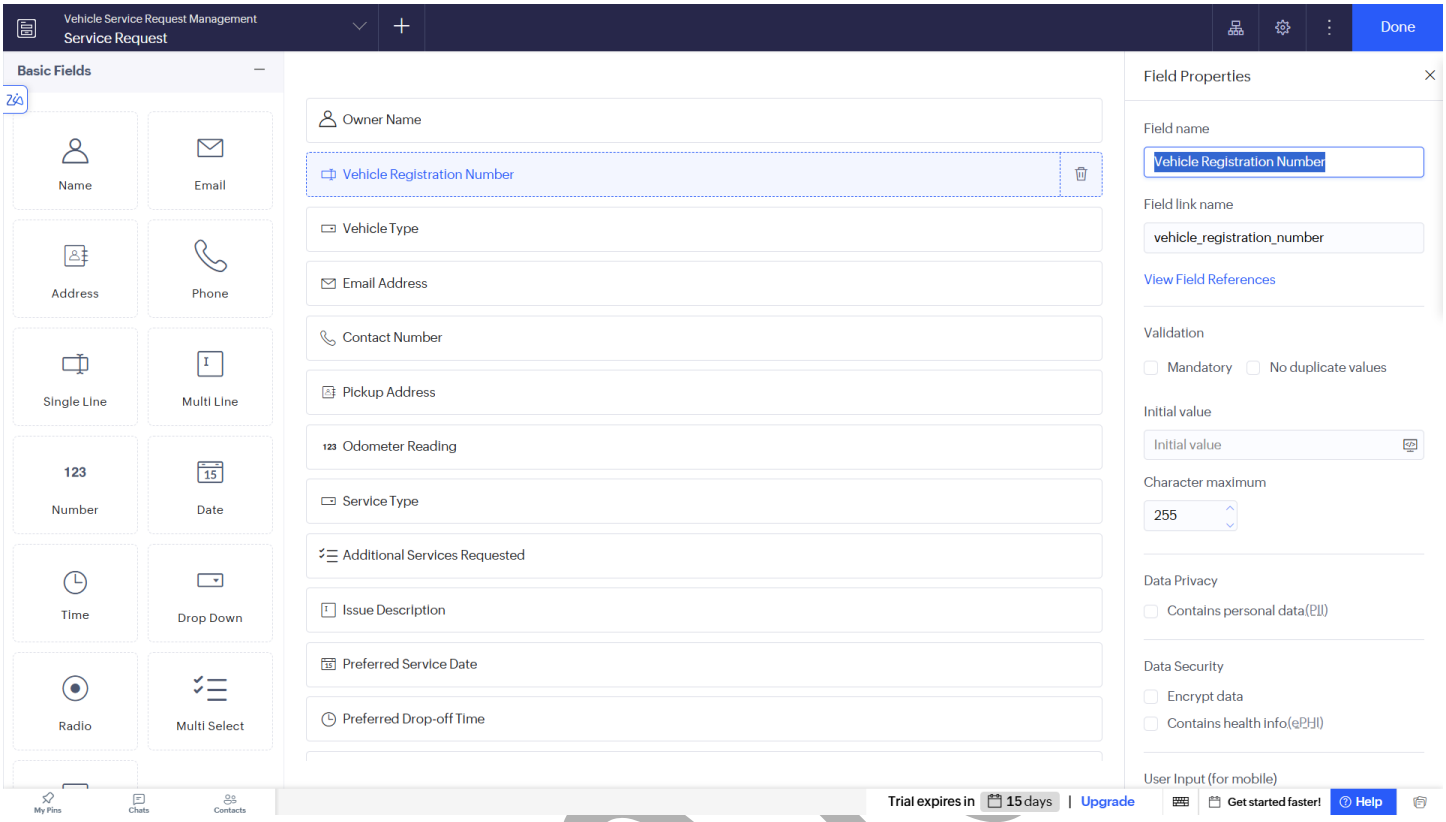

To design and build a functional "Vehicle Service Request Form" application in Zoho Creator that demonstrates the correct usage of all thirteen Basic Fields available in the Form Builder, while solving a real automobile service-center requirement of scheduling and pre-recording vehicle service and repair requests.

Procedure:

1. Owner Details Configuration (Section A):

Create the "Service_Request_Form" and configure fields for Owner Name (Name field), Vehicle Registration Number (Single Line), and Vehicle Type (Drop Down). Set these as mandatory fields.

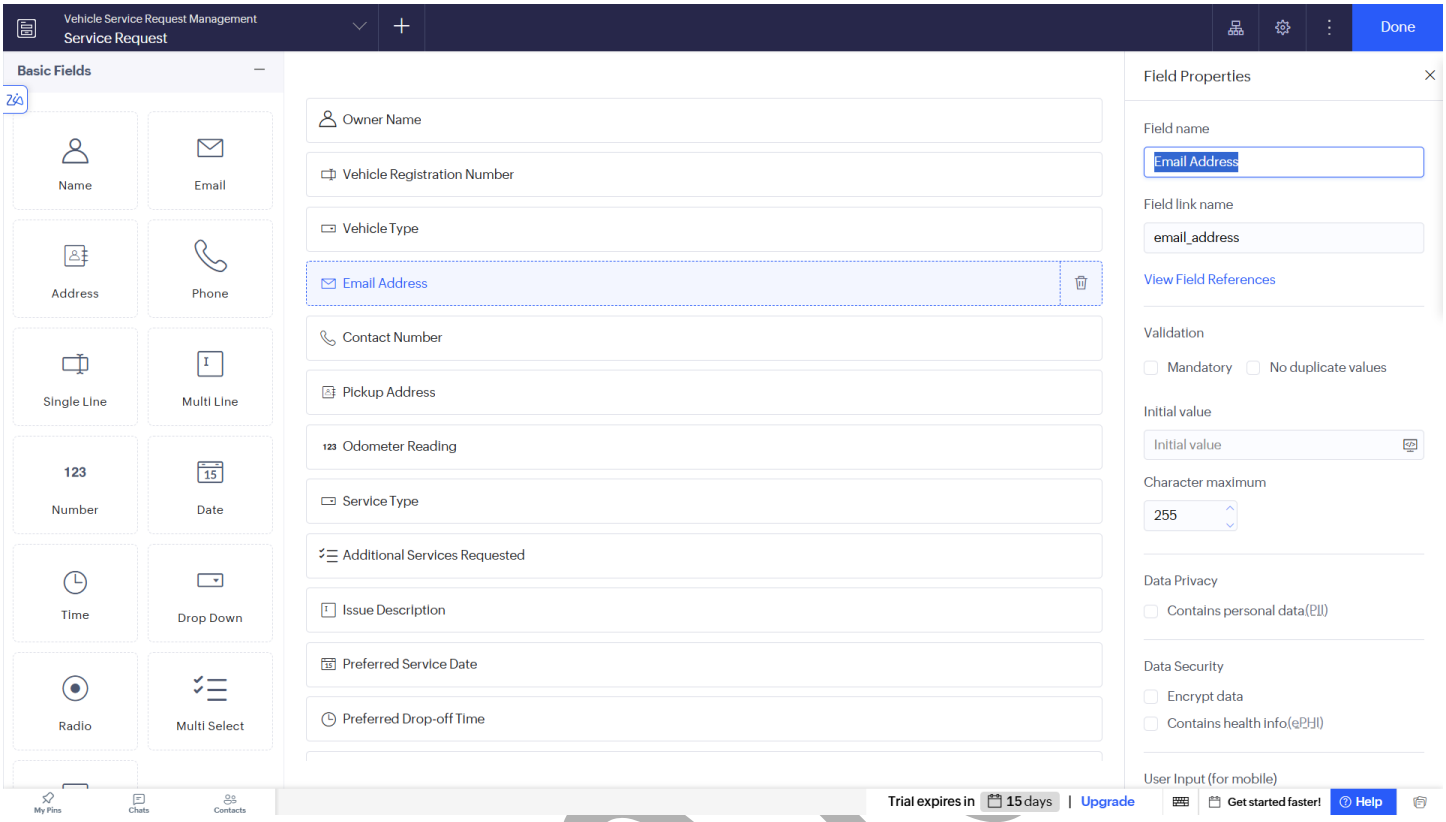

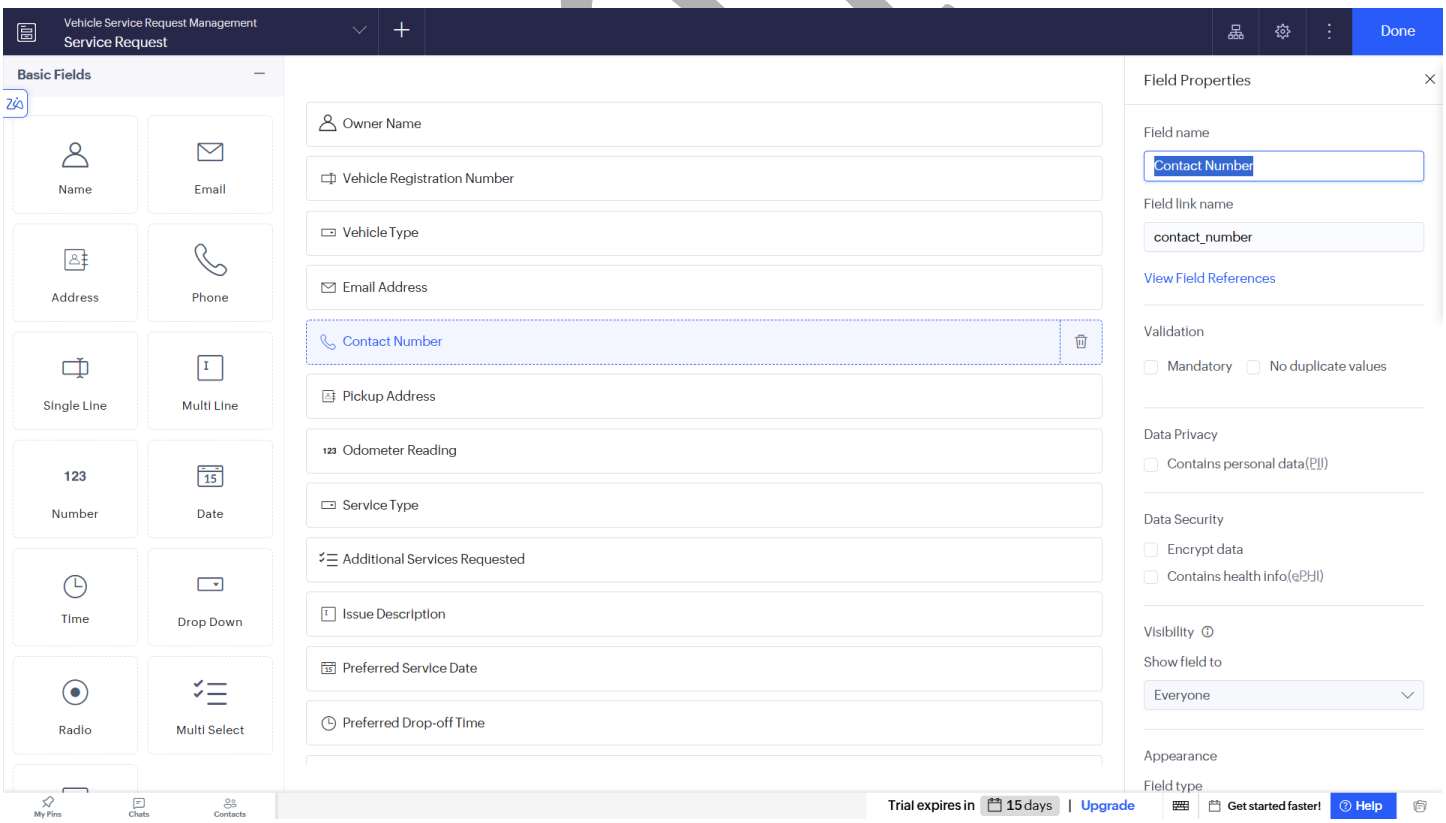

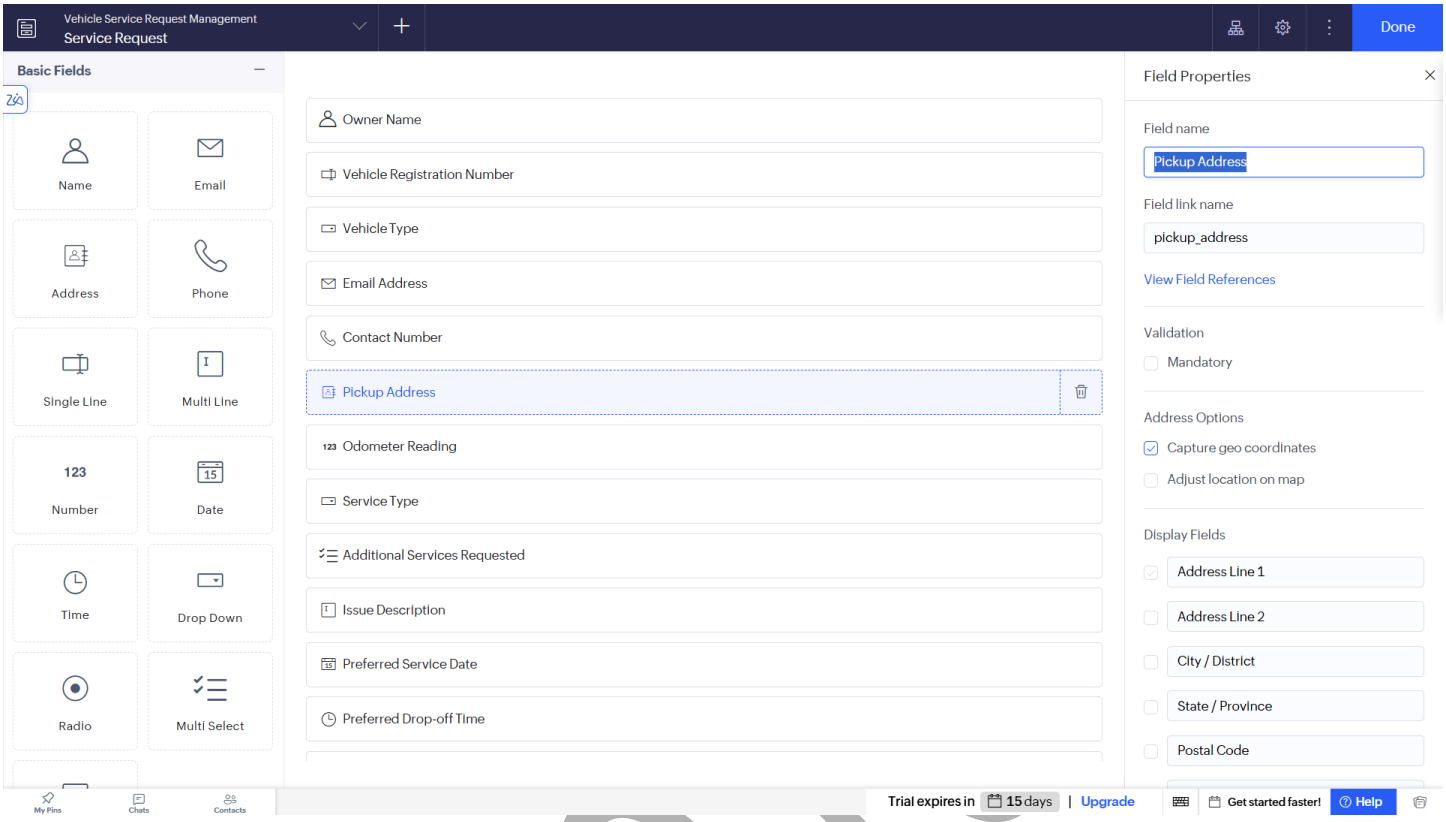

2. Contact Details Configuration (Section B):

Add the Email Address field (with built-in email format validation), Contact Number field (with Indian country code formatting enabled), and Pickup Address field.

4. Scheduling & Authorization Setup (Section D):

Add Preferred Service Date (Date field restricted to disallow past dates), Preferred Drop-off Time (Time field), and an Authorize Estimate And Repair Checkbox which must be checked for form submission.

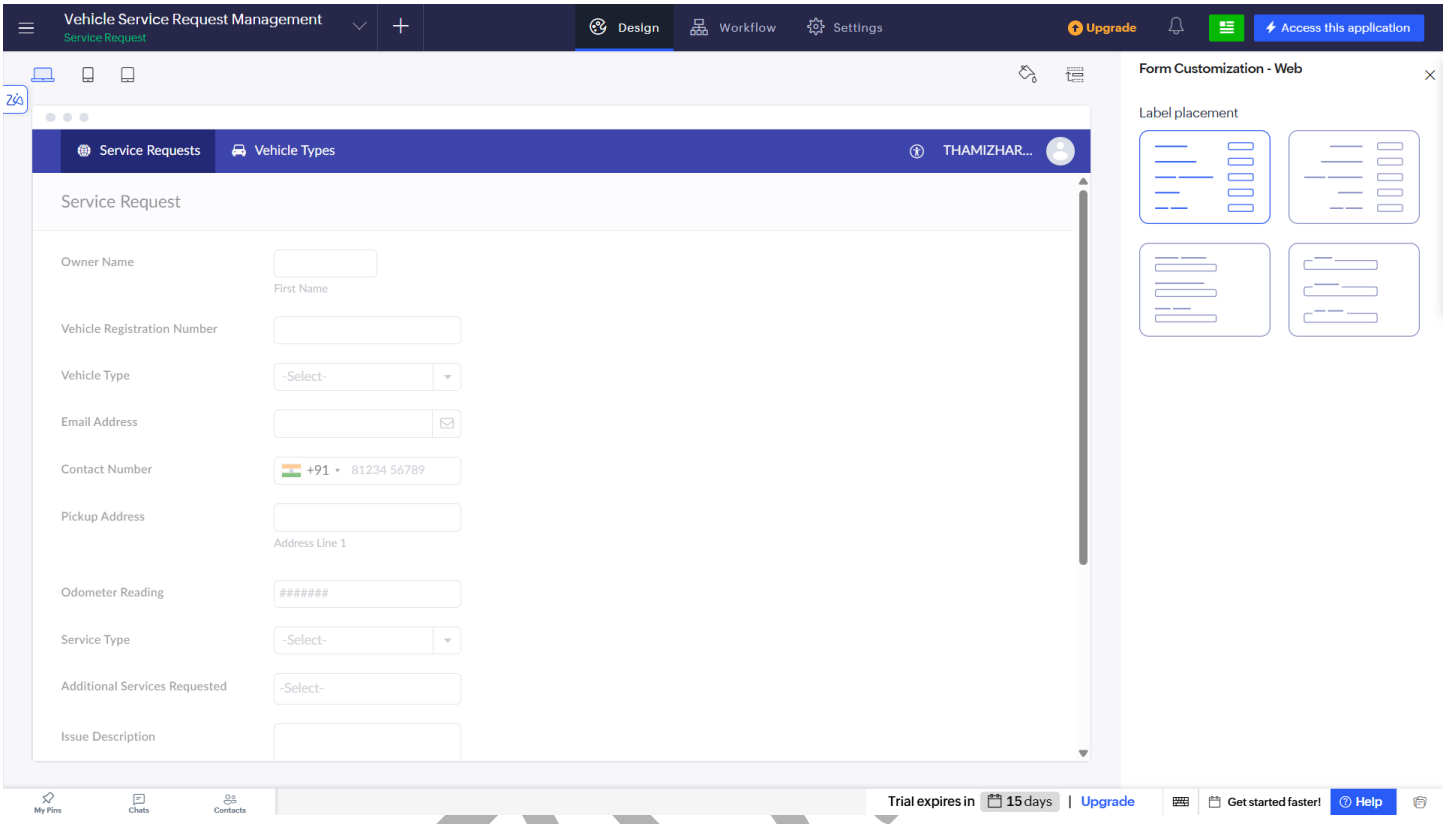

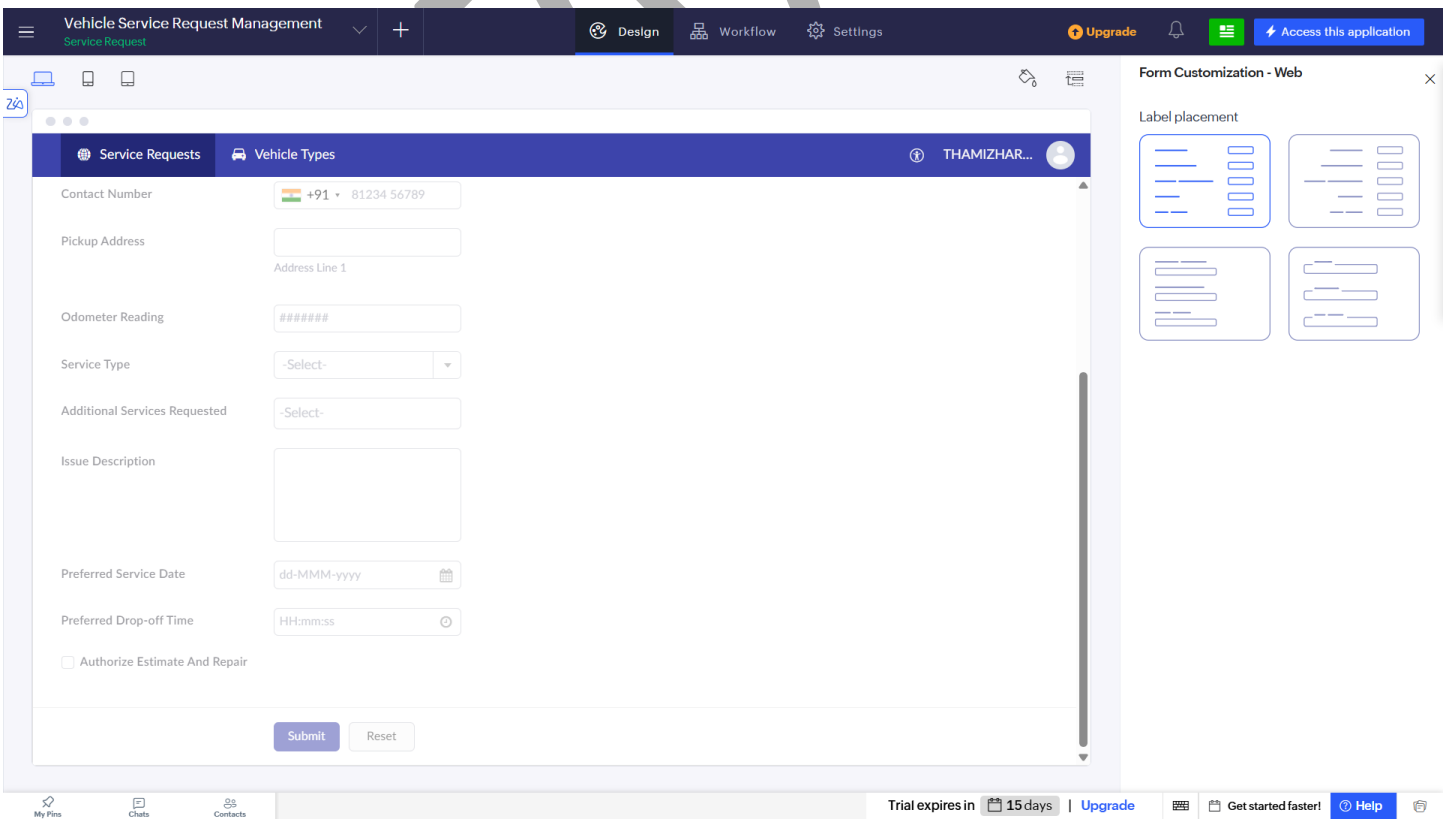

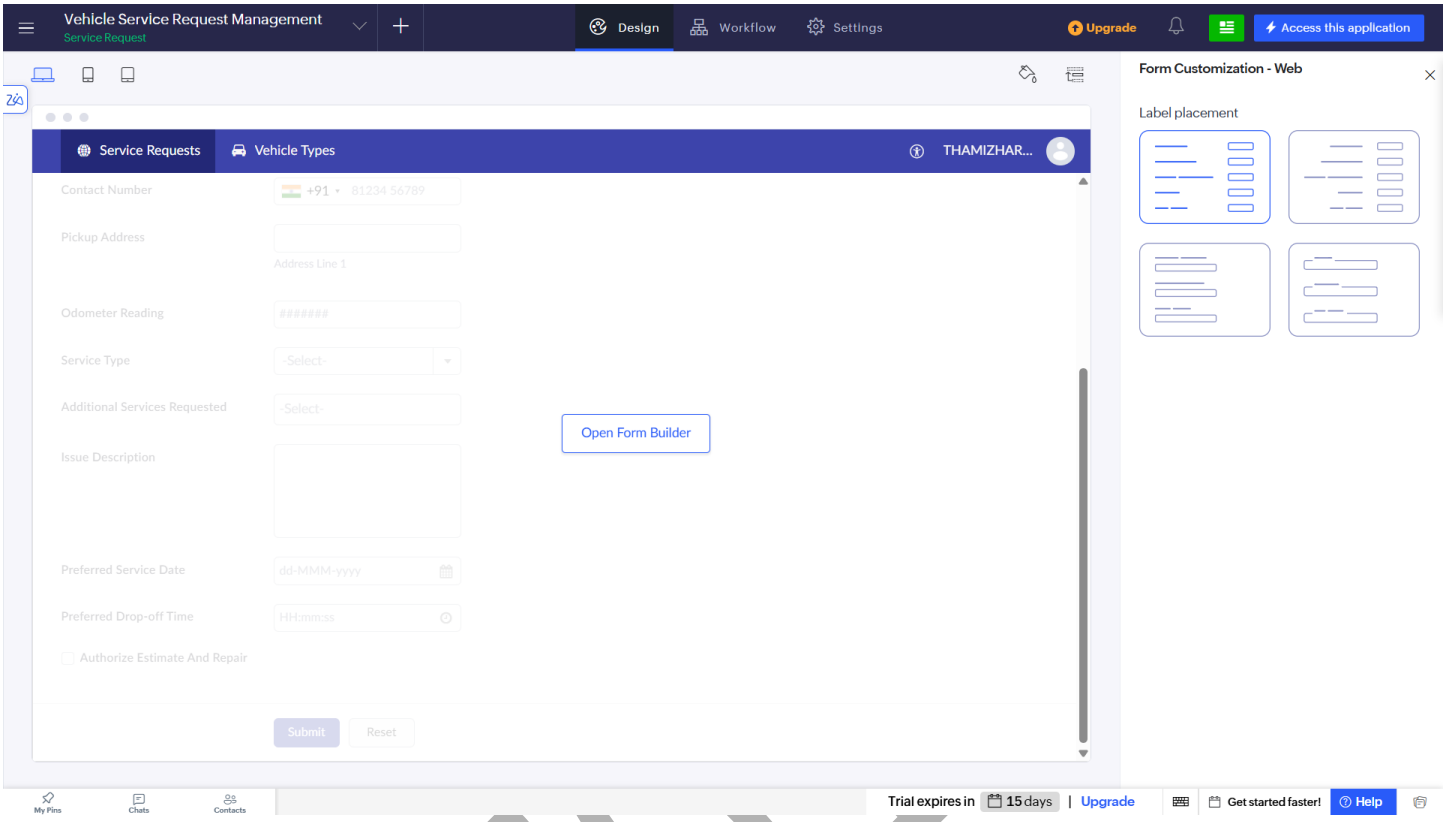

5. Form Layout & Customization:

Adjust the field layout, widths, and label placements within the Form Customization workspace to ensure a clean, accessible user interface for the service center customers.

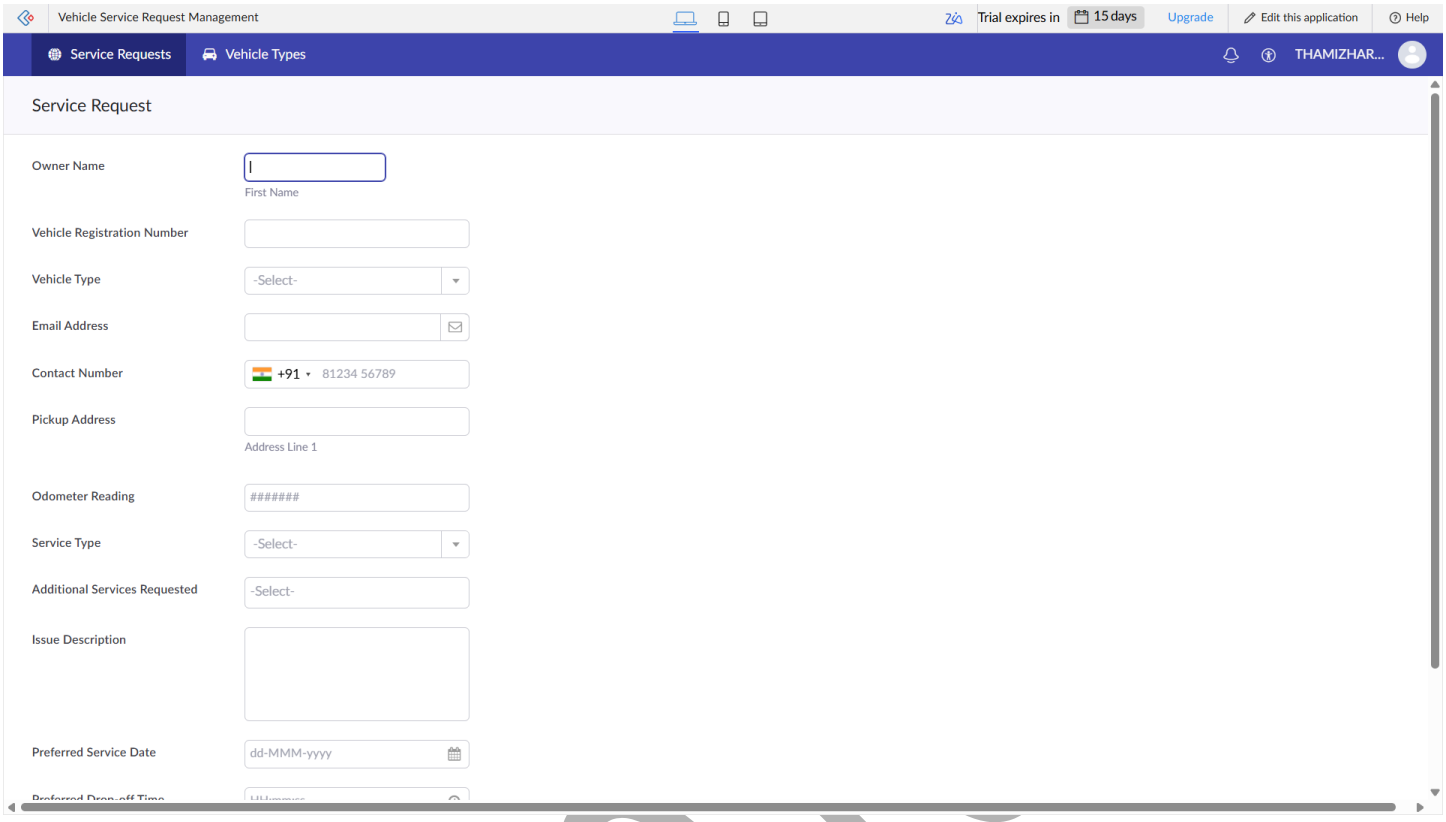

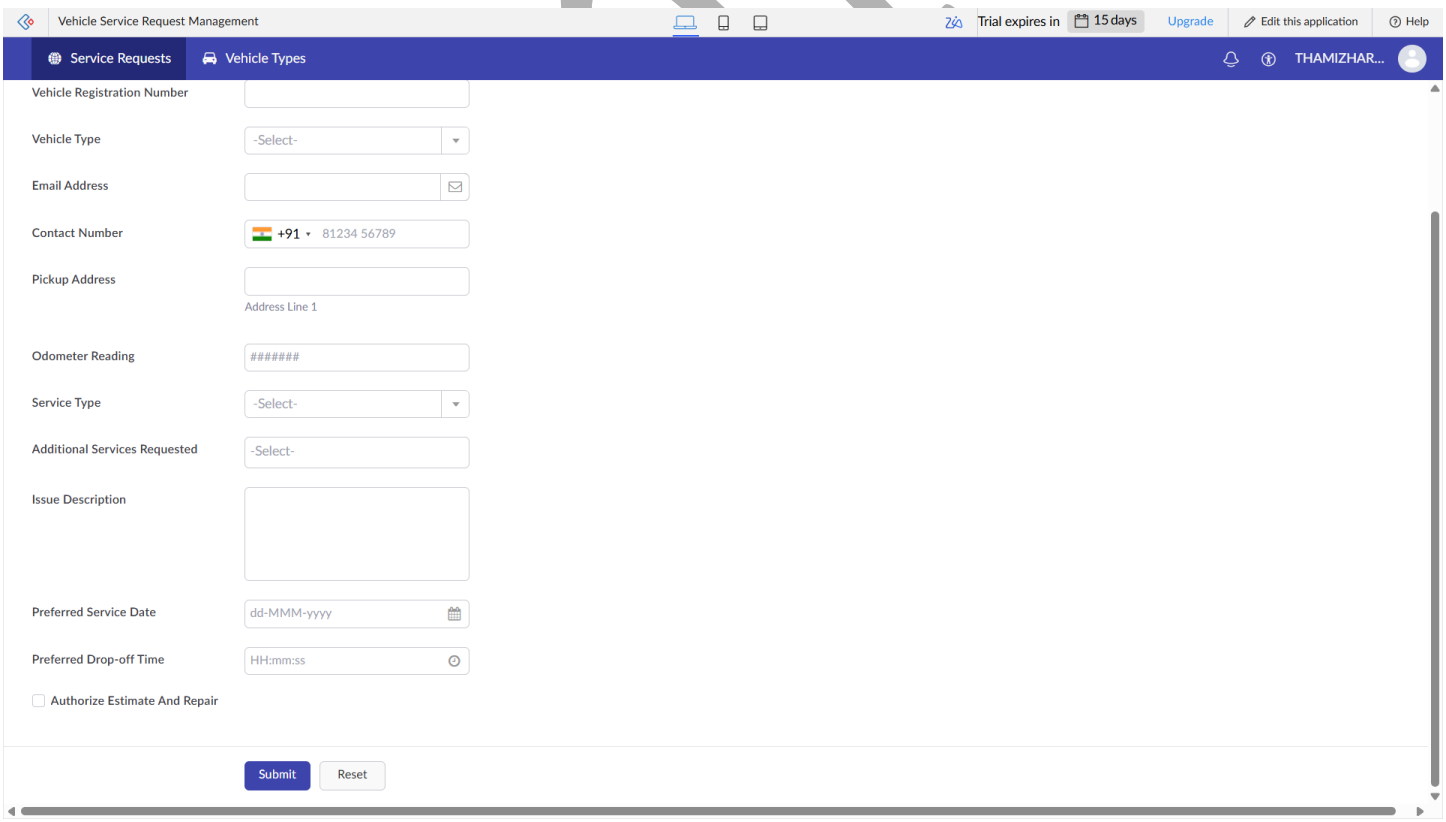

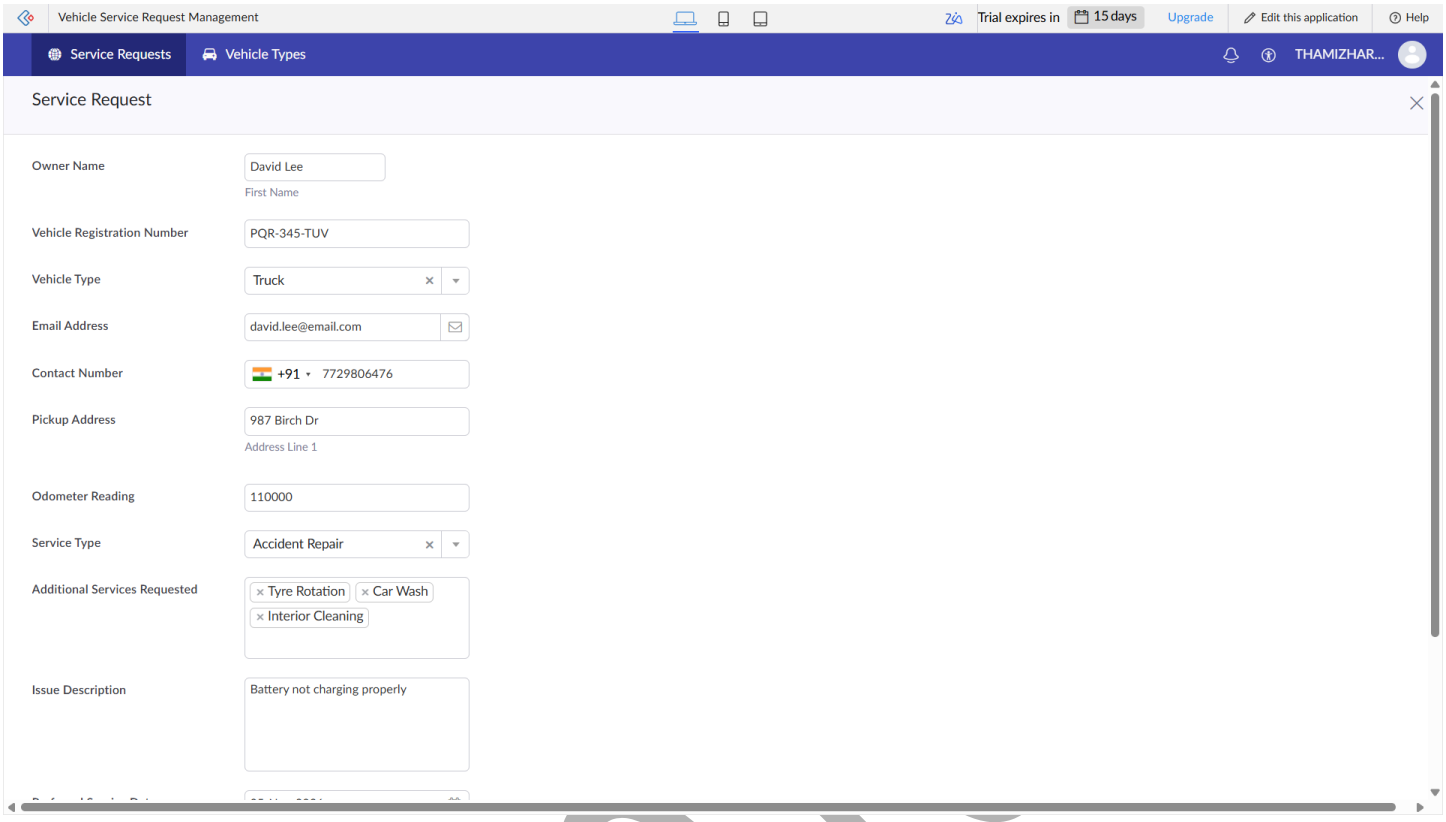

6. Live Form Preview & Submission:

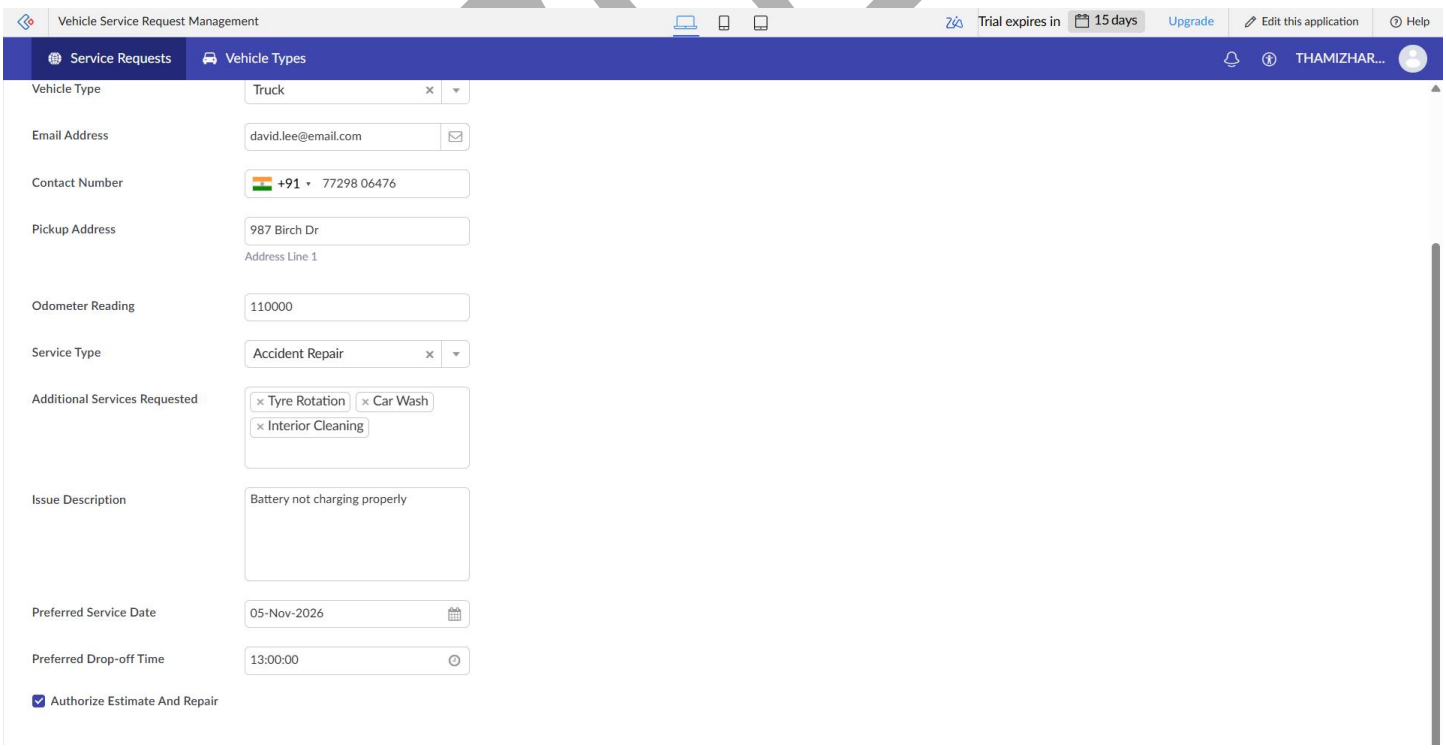

Launch the live application preview. Fill in sample details (e.g., David Lee, Truck, Accident Repair) to verify that all mandatory validations and layout structures work flawlessly before submitting the data to the Service_Request_Report.
